d) Create standard operating procedures

4. _____ is NOT a key element of TPM

a) Corrective maintenance

b) Scheduled preventive maintenance

c) Employee involvement in maintenance prevention

d) Outsourcing all equipment repairs

5. The "Overproduction" waste in Lean Manufacturing refer to _____

a) Producing more than what is needed, leading to excess capacity

b) The time workers spend waiting for resources or information

c) The unnecessary movement of materials or products between workstations

d) The cost of maintaining excessive inventory

TLO 3.3: State the importance of ISO quality standards

1. The abbreviation "ISO" stand for?

a) International Service Organization

b) International Standards Organization

c) International System Organization

d) International Organization for Standardization

2. The key types of quality standards include following standards except _____

A) FDA standards

B) ISO standards

C) Lean/Agile Quality standards

D) PERT/CPM

3. From the following _____ is NOT a quality standard.

A) ISO 9001

B) ISO 14001

C) Six Sigma **D) ISO 50001**

4. The PDCA cycle stands for _____

A) Plan-Do-Check-Act

B) Plan-Do-Check-Assess

C) Prepare-Differ-Correct-Act

D) Plan-Do-Cite-Advice

5. OSHA's General Industry Standard includes _____

A) Excavation

B) Workplace safety

C) Risk from shipboard operations

D) Tractor safety

TLO 3.4: Describe ERP

1. ERP system uses _____ platforms

A) Decentralized

B) Autocratic

C) Centralized

D) Democratic

2. _____ from the following NOT a benefit of implementing an ERP system

A) Increased efficiency in business processes

B) Improved productivity across different departments

C) Lack of real-time information

D) Better coordination & communication between department

3. The primary goal of ERP (Enterprise Resource Planning) systems is to _____
- A) Increase company profits by reducing employee salaries
B) Increase productivity & provide real-time data
C) Manage employee personal information
D) Reduce the need for communication across departments
4. The main advantages of cloud-based ERP system includes
- a) Higher upfront costs
b) Limited accessibility
c) **Scalability and lower upfront costs**
d) Only accessible through PC's
5. The cloud-based ERP solutions are preferred for accessing software remotely because Cloud ERP systems _____
- a) Can only be accessed during business hours
b) Provide limited access to employees outside the office
c) **Allow to access software from anywhere, at any time, on any device**
d) Require complex local installations

TLO 3.5: State the importance of ISO

1. ISO standard focuses on quality management systems?
- A) ISO 14001 **B) ISO 9001** C) ISO 45001 D) ISO 50001
2. The following a direct benefit of implementing ISO standards _____
- a) Increased bureaucracy
b) **Improved risk management and reduced operational costs**
c) Limited product development
d) Decreased employee involvement in decision-making
3. ISO certification help to improve _____ within an organization
- A) Marketing and production strategies B) Organizational hierarchy
C) Financial investments only **D) Efficiency, quality, and customer satisfaction**
4. The key focus of ISO 14001, part of the ISO 14000 series is _____
- a) Enhancing financial performance only
b) Implementing energy-efficient practices
c) **Establishing environmental management systems**
d) Setting prices for environmentally friendly products
5. ISO standard focuses on environment management systems?
- A) ISO 14001** B) ISO 9001 C) ISO 45001 D) ISO 50001
